HDPE Watertight Fittings

Watertight fittings are available in most standard configurations. There are many variations to fittings that can be made, therefore if you do not see what you need please give us a call. Watertight fitting joints are specified to meet a laboratory pressure test of 10.8 psi per ASTM D-3212. These joints are designed to prevent infiltration of soil and exfiltration of storm water. The joints have a bell-bell design and incorporate an ASTM F-477 elastomeric rubber gasket.
