IMPORTANT - ATTENTION - VERTICAL RISERS ARE NOT RECOMMENDED

When vertical risers can not be avoided, consult the design engineer as special precautions are required.

Fittings should be installed so the outlet stubs are positioned no more than 45° from the horizontal or by using one of the methods illustrated below. The methods transfer loads helping to eliminate fittings breakage and pipe punch through.

Note - Drawings in this catalog are representations and are not for engineering purposes. Contact the factory for submittals. All fittings in this catalog are for non-pressure service.
